Author index of Volume 42

Berry, D.M., Formal methods: the very idea Some thoughts about why they work when they work	(1)	11- 27
Berzins, V., Lightweight inference for automation efficiency	(1)	61- 74
Broy, M., *see* Luqi	(1)	1- 10
Cleaveland, R. and S.T. Sims, Generic tools for verifying concurrent systems	(1)	39- 47
Cooke, D.E. and V. Kreinovich, Automatic concurrency in SequenceL	(1)	115-128
Feijs, L.M.G. and Y. Qian, Component algebra	(2-3)	173-228
Gelfond, M. and R. Watson, On methodology of representing knowledge in dynamic domains	(1)	87- 99
Kreinovich, V., *see* D.E. Cooke	(1)	115-128
Krämer, B.J., *see* N. Völker	(1)	101-113
Kwak, H.-H., I. Lee and O. Sokolsky, Parametric approach to the specification and analysis of real-time scheduling based on ACSR-VP	(1)	49- 60
Lee, I., *see* H.-H. Kwak	(1)	49- 60
Luqi and M. Broy, Software engineering beyond our planning horizon: automation for computer-based systems	(1)	1- 10
Polak, W., Formal methods in practice	(1)	75- 85
Potrich, A., *see* P. Tonella	(2-3)	229-271
Qian , Y., *see* L.M.G. Feijs	(2-3)	173-228
Robertson, D., Pitfalls of formality in early system design	(1)	29- 38
Sims, S.T., *see* R. Cleaveland	(1)	39- 47
Sokolsky, O., *see* H.-H. Kwak	(1)	49- 60
Tonella, P. and A. Potrich, Cjj: a subset of C++ compliant with Java	(2-3)	229-271
van der Aalst, W.M.P., K.M. van Hee and R.A. van der Toorn, Component-based software architectures: a framework based on inheritance of behavior	(2-3)	129-171
van der Toorn, R.A., *see* W.M.P. van der Aalst	(2-3)	129-171
van Hee, K.M., *see* W.M.P. van der Aalst	(2-3)	129-171
Völker, N. and B.J. Krämer, Automated verification of function block-based industrial control systems	(1)	101-113
Watson, R., *see* M. Gelfond	(1)	87- 99
